Considering Cosmetic Surgery...!?

Why risk cosmetic surgery when amazing results can be achieved without going under the knife. An upper eye blepharoplasty is one of the most popular cosmetic surgery procedures carried out these days to achieve a fresh, well rested appearance.

PLASMA ELITE

At Alpha Beauty Clinic we offer PLASMA ELITE, a revolutionary fibroblast technology which offers shrinkage of excess skin to give a similar result to cosmetic surgery.

Hooded eyelids will be lifted, eyes will look more open and eye make-up will now be a lot easier to apply.

"I'm really pleased with the results I've had from Plasma Elite; I actually can't stop looking at myself in the mirror! (truth) It's given me so much more confidence. I didn't realise how old and tired my eyes were looking before but now they are tighter and fresher looking. This is a genuine review and I would be happy to be contacted by anyone considering this treatment."
