New 3D Radio Frequency Eye Tightening Treatment

This Spring we are so excited to launch Radio Frequency Eye Tightening at Alpha. This NEW treatment targets crow's feet, reduces eyebags and improves the condition of the skin to the upper and lower eyelids. It's non-surgical, non-invasive & skin repairing, encouraging the formation of new elastin and collagen fibres.

How many treatments will I need?

You will see an instant firming and plumping effect following a single treatment, however we recommend starting with a course of 6 treatments, taken weekly for best results and to provide longevity of the skin tightening and plumping.

Benefits include:

- Improves skin condition and crepiness.
- The stimulation of new collagen will give a lift to eyes improving a hooded eyelid.
- Fine lines and wrinkles will be plumped out and softened.
- Improves tired looking eyes giving a fresh, youthful appearance.

£65 per individual session.

Introductory offer: A course of 6 treatments £292.50

Saving £97.50. (March – May)
